JUDGEMENT

The analysed sample can be classified as composite and processed food according to article 20 of regulation (EC) 396/2005 (regulation on maximum residue levels in food and feed).

Where MRLs are not set out in Annexes II or III for processed and/or composite food or feed, the MRLs applicable shall be those provided in Article 18(1) for the relevant product covered by Annex I, taking into account changes in the levels of pesticide residues caused by processing and/or mixing.

The results of the above mentioned analyses are in accordance with the requirements of regulation (EC) 396/2005 (regulation on maximum residue levels in food and feed) in its currently valid version.

Nevertheless, the standards laid down under article 19 of regulation (EC) 396/2005 (regulation on maximum residue levels of pesticides in or on food and feed) have to be taken into account for each ingredient.

With respect to the results of the above mentioned analyses, samples of the same quality which carry the organic label can therefore be traded likewise as long as they comply with the requirements of regulation (EC) 834/2007 on organic production and labelling of organic products read in conjunction with commission regulation (EC) No 889/2008 and its amendments.
